# Coating Thickness Guage

Destructive coating thickness gauge for measuring or coatings. A thin layer or paint is removed, and the base or the instrument is placed on the coating. The probe measures the distance to the substrate material. Commonly used for measuring thin shop primers on test panels. Delivery incl. carrying case and zero plate.

| Specifications | CTG |
|---|---|
| Range | 0-1000 microns |
| Resolution: | 1 micron |

## CTG

- Destructive coating thickness gauge for measuring or coatings.
- Commonly used for measuring thin shop primers on test panels.
