

D443

Digital Rotational Viscometer

Measures viscosities of dye solutions, pastes, sizing compounds, lubricants or adhesives. Digital Rotational Viscometer complete with stand and spindle set direct display of viscosity in centipoise or millipascal/seconds, %torque, spindle number and speed (18 speeds 0.3-100RPM). Complete with set of spindles for low or medium viscosity. Complete with hard carrying case.

Specifications	D443
Weight	8 kg
Dimensions	350 x 200 x 800 mm (WxDxH)
Standards	No Standards
