

# F214

## Precision Fiber Microtome

Precision Fiber Microtome. To produce fiber cross sections of varying thickness from 10 microns for microscopic examination, measurement and identification.

Specifications	F214
Weight	3 kg
Dimensions	75 x 150 x 100 mm (WxDxH)
Standards	ASTM D2130, BS 2043, DIN 53811, ISO 137, IWSTM 24, IWTO 8-61

### F214

■ To produce fiber cross sections of varying thickness from 10 microns for microscopic examination, measurement and identification.
