

# G201AA

## SafQ Snap Tester

To determine the holding or breaking strength of pronging attached snap fasteners onto garments. Consists of an Upper Snap Clamp, a Lower Fabric Clamp & Force Gauge mounted on a Stand. The snap component is gripped by the Upper Snap Clamp and the garment is fixed to the lower Fabric Clamp. By turning the Top Flywheel, the operator can apply a specific force and the holding force or the breaking strength can be recorded. Capability can be enhanced with clamps & accessories for testing of other Snaps, Jean Buttons, Four Hole Buttons & Garments Accessories such as Zippers, Bows, Appliqué, Toggles, Hooks/Bars, and D-Rings, amongst others. The detachment of a snap or other part may be classed as small parts; whilst broken small parts may require sharp point & sharp edge testing. As a result, additional testing equipment may be recommended.

- Small Parts Cylinder (G201A9-10)
- Sharp Point Tester (G201A1-3)
- Sharp Edge Tester (G201A4-6)
- Button Impact Tester (M289)

### Specifications

### G201AA

Weight	23 kg
Dimensions	225 x 280x 735 mm (WxDxH)
Standards	M&S P115A
