

# M290DR

# Laboratory Drying Rate Tester

The Drying Rate Tester gives retailers, fabric manufacturers, and textile additive producers a consistent method of measuring the drying rate of a fabric. This device can be used independently to find a drying rate or in conjunction with the SDL Atlas Moisture Management Tester (MMT) in order to obtain a more complete understanding of the moisture management properties of a performance fabric.

Specifications	M290DR
Weight	0.21 kg
Dimensions	250 x 180 x 450 mm (WxDxH)
Standards	No Standards

## M290DR
