# Match Pigment

Datcolor Match Pigment is an intelligent color formulation solution for paint, plastic, ink and cosmetics industries, which enables you to generate the best formula for your color quickly and easily, resulting in a more efficient process and greater productivity. Customize your matching with many different criteria, and Datcolor Match Pigment adapts to your workflow. Work the way you want with Formula Central, a virtual color laboratory. Match a single sample or an entire folder of standards; then correct, search, retrieve, save, scale, or change units - all on one screen – just the way you want it. Complex matching operations are simple and intuitive today.
