Octoplex Applicator

Film application in coating industry includes a broad range of different devices and instruments which are an absolute necessity for testing or evaluation. Only in this way the quality-related properties required can be tested, compared, documented and communicated in compliance with the requirements. Octoplex Multifunctional film applicator with 8 pre-defined thickness sides for applying paint-films of: 25, 50, 75, 100, 125, 150, 175, 200 micron. Film width 60 mm. The high-grade stainless steel will not be affected by acid or base elements.

Details

	Width 60mm
25 / 50 / 75 / 100 / 125 / 150 / 175 / 200µm	VF1550

OA

- Multifunctional film applicator with 8 pre-defined thickness sides for applying paint-films.
- Made of high-grade stainless steel.
- Not affected by acid or base elements.
