

Y006

Electronic

Yarn Count System

Consists of an accurate electronic balance with a capacity of 600gx 0.01g (Model G204D), connected by RS232 bidirectional interface to a computer. The included software automatically calculates total, average, minimum, maximum range, standard deviation and percent CV for any number of samples per test session and operates in most international count systems used for sliver, roving and yarn, and can also be used for fabric yield.

Specifications	Y006
Weight	4.5 kg
Dimensions	250 x 400 x 100 mm (WxDxH)
Standards	ASTM D1907/D2646/D3776, BS 2471/EN 12127, ISO 2060/3801, IWSTM 13, IWTO 22-82

Y006

- Automatically calculates total, average, minimum, maximum range, standard deviation and percent CV for any number of samples per test session.
- Can also be used for fabric yield.
