

# Y096A/B

## Portable Mechanical Yarn Friction Tester

Portable Mechanical Yarn Friction Tester. To determine the coefficient of friction of moving yarns and assess the need for lubrication or suitability for further processes(in fitted case) Drive Unit, with friction tester mounting and tension device to convert the portable yarn friction tester into a laboratory unit.

Specifications	Y096A/B
Weight	7 kg
Dimensions	400 x 300 x 220 mm (WxDxH)
Standards	ASTM D3108

### Y096A/B

- To determine the coefficient of friction of moving yarns and assess the need for lubrication or suitability.
- With friction tester mounting and tension device to convert into a laboratory unit.
